## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Driving an organic electroluminescent emission device in a manner such that the prescribed electric fields are substantially always different from each other in ***strength*** as applied with variation in a time-dependent manner to electrode pair regions adjacent to each other among the plurality of electrode pair regions (see claims 1, 15, and 19-28, for instance).

Species II: Driving an organic electroluminescent emission device in a manner such that the prescribed electric fields are substantially always different from each other in ***polarity*** as applied with variation in a time-dependent manner to electrode pair regions adjacent to each other among the plurality of electrode pair regions (see claims 2-10, 14, 16, and 18, for instance).

These two inventive species each utilize a separate and distinct driving method. Each species requires a separate and distinct search. Searching all species would be constitute a burdensome examination. Therefore, restriction of the instant application is deemed proper and necessary at this time.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable

thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
